

NORTH AMERICAN TITLE COMPANY County Web Sites

While each county has a different layout for their Web site, most of the counties listed provide a way to search for property data.

First, find the assessor's section of the Web site. This might be under a category called "Departments" or you might see a link on the home page, which will take you directly to it.

Once there, look for a button or link called "Property Search" or something similar. In most counties, you can search by property address, parcel number or the property owner's name.
